The closest prior art of record (US 4,256,458) does not teach or disclose a process for
dyeing human keratin fibers with lighting effect, a composition comprising a cosmetically
acceptable medium and at least one fluorescent dye of the claimed formula present in an amount
sufficient to dye keratin material or a multi-compartment kit for dyeing keratin materials
comprising at least one fluorescent dye of the claimed formula in a combination and at least one
oxidizing agent as claimed. Further, the closest prior art of record does not teach and disclose a
fluorescent dye of the claimed formula in which R1 and R2 are radicals other than methyl
radicals, R5 and R6 are not hydrogen atoms and R3 and R4 are other than hydrogen atoms as
claimed. Accordingly the claimed subject matter as a whole would not have been obvious to one
having ordinary skill in the art of keratin materials dyeing formulation.
